

BIOTRACE[®]

STERILE BARIUM SULFATE USP

The Most Recommended Radiopacifier in the World

Exclusive Features:

- 100% United States Pharmacopeia (USP) Extra Pure Barium Sulfate
- Regulated Particle Size
- Non-pyrogenic
- Gamma Irradiated
- 6 Gram Dosage
- Supplied Sterile in a 50 ml Vial
- 2-Year Shelf Life

Biotrace[®], the most recommended radiopacifier in the world, is a high quality, cost-effective medical device that has received a CE mark for international distribution. Mixed with bone cement*, Biotrace[®] provides an opaque, consistent image through fluoroscopic guidance during and after administration.

*Biotrace[®] is indicated for use as an additive to Codman Cranioplastic™ (Type 1-Slow set) to provide radiopacity for imaging purposes.

BIOTRACE® BONE CEMENT RADIOPACIFIER

Biotrace® Sterile Barium Sulfate USP

The Most Recommended Radiopacifier in the World

Biotrace® is the leading sterile barium sulfate product indicated for use as an additive to bone cement*. Cost-effective, convenient and easy to use, Biotrace® is CE marked and is the radiopacifier most recommended by physicians around the world.

Advanced Imaging Capabilities

The uniform particle size of Biotrace® allows for an even dispersment of barium sulfate during preparation with the associated bone cement*. Resistant to compaction, Biotrace® provides superior guidance and consistent imaging under fluoroscopy during and after administration.

Superior Quality

Biotrace® is non-pyrogenic and gamma irradiated with a regulated particle size. It is packaged sterile in 50 ml vials containing 100 % pure barium sulfate. Manufactured according to Good Manufacturing Practices (GMPs), Biotrace® conforms to United States Pharmacopeia standards and has a two year shelf life.

*Biotrace® is indicated for use as an additive to Codman Cranioplastic™ (Type 1-Slow set) to provide radiopacity for imaging purposes.
